If lost economic productivity is also considered, the total cost of chronic diseases increases to \$3.7 trillion, which is close to one-fifth of the entire US economy (7,8). These costs are expected to increase as the population ages — projections indicate that by 2030, more than 80 million people in the United States will have at least 3 chronic diseases (7).

Second, the cost of milking a cow on a per hundredweight basis is often 30%-150% higher than other areas. The annual labor cost alone milking in a stall barn versus a well designed parlor could justify a \$10,000 to \$20,000 low-cost parlor expense with the labor savings realized in less than one year.

was £50. There was a strong consensus that the cost of bulbs is falling. We also obtained bulb costs directly from four suppliers (actual ordering costs). These varied somewhat between different types of bulb and fitting (GU10, MR16, E27 or E14), but all types of

The Thesaurus Musicarum Latinarum is a full-text database of music theory written in Latin, extending from Augustine's De musica through treatises of the sixteenth century. This new edition of the Thesaurus Musicarum Latinarum: Canon of Data Files includes full instructions

on the various ways in which users can access the database, as well as the ?Principles of Orthography? and ?Table of Codes for Noteshapes, Rests, Ligatures, Mensuration Signs, Clefs, and Miscellaneous Figures,? both of which provide essential explanations of the special ways in which the texts have been encoded to facilitate searching and maximize use within various computer environments. Also included is a table of contents for the major series of texts found in the TML. The Canon provides for each separate edition a bibliographic record of the name of the author; title of the treatise; incipit; source of the text; the names of the individuals responsible for entering, checking, and approving the data; the name and location of the data file as it appears within the TML; the size of the file; and annotations identifying accompanying graphics and various other types of pertinent data. The Canon is followed by a full alphabetical index of incipits, keyed to both the Canon itself through author and title and to the database through the name of the data file as it appears within the TML.

This is the 11th in the series of directories whose overall aim is to make sense of the myriad files in the marketplace by listing databases completely, and grouping them logically. The title, Company Information, implies a somewhat narrower focus than the directory offers, as the five sections ac

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

The first edition of this dictionary, compiled by F.J.M. Wijnekus and published in 1967, was the result of years of systematic collection and preparation of thousands of terms and expressions which were until then not to be found in any other dictionary. The material was correlated for use in his daily work and, as the reputation of his private collection spread, there was an increasing demand for access to these findings. Until 1967 there was no comprehensive multilingual dictionary on the subject; former publications were incomplete and out of date and lacked clear definition - often leading to disastrous misunderstandings. Furthermore, the subject of printing, paper and ink technology had never been dealt with, in dictionary form, in relation to other aspects of the graphic industry. This new work, prepared by F.J.M. Wijnekus and his son, has been considerably up-dated. Much time has been devoted to checking the material against the most reliable and authoritative sources. The usefulness of the work has been further enhanced by the addition of Spanish and Italian to the original languages of English, French and German. The first edition was received with much enthusiastic praise and this new dictionary will undoubtedly continue to be an invaluable tool for all those working with the printed word in the widest sense. It is a reference work which should be in the hands of all those in any way connected with the printing industry, paper manufacturers, ink manufacturers, printers, bookbinders, publishers, lithographers, lay-out men and graphical research institutes.
