The country consumes a total of 9 billion ... Nord Stream 2 and Turkish stream, the expert said. Until recently, the European Commission had reiterated that the EU had no need for new gas pipelines.

<p>Academia of modern, still emerging sciences were particularly involved in the so-called“war of the intellectuals”: an-thropology, (anthropo-)gography, ethnopsychology. The book tells the story of this engagement in Eastern and Southeastern Europe. OG ó rny/s study deals with WWI political engagement of science with an eye on Eastern Europe between 1912 (the First Balkan War) and 1923. The writings of intellectuals from this region that subscribed to the tradition of“national characterology” skillfully integrated the most modern science of the time: physical anthropology, psychiatry and anthropogeography. Consequently, neither in the intellectual standing of the authors, nor in the discursive strategies they used did the intellectuals’ war in the East fundamentally deviate from its counterpart on the Western front. Yet, their liaison with politics proved to be even longer, harsher and more fateful than in the West.</p>
<p>This book gives a complex description and discussion of today ’ s populist attacks against the European Union (EU) following the financial crisis of 2008, which opened the floodgates of dissatisfaction, and the migration crisis which destabilized the traditional solidarity basis of the EU. The problem of Brexit is also explored. Each chapter presents one of the main elements of the crisis of the EU. These include West European populism, Central European right-wing populism in power, and the exploitation of the EU ’ s mistake during the migration crisis of the mid-2010s. These also include the discovery of Christian ideology against immigration and hidden anti-Semitic propaganda using a hysterical attack against the liberal billionaire philanthropist George Soros, and Brexit. There is a detailed discussion of the failures of the EU to pacify the neighbourhood in the South and North, especially in Ukraine, and the rising hostile outside enemies of the EU, including Russia and Turkey, bad relationships with Trump ’ s America, the uncertainty of NATO, and the emergence of a new rival, China, that enters into the Central European edge of the EU. The author explores strategies for coping with, and emerging from, this existential crisis and ends with the alternative plans and possibilities for the future of the eurozone. This will be an invaluable resource for understanding the crisis of the EU, one of the central questions of contemporary international politics for undergraduates and graduate students, and readers interested in the discussion surrounding an endangered European integration and difficult world politics.</p>
<p>The world’s most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographic index. 47 photographs and illustrations - mostly color. Free of charge in digital PDF format.</p>

Acclaim for the first edition: Ó The book is essential for students in European studies, international economics and business or international relations at both graduate and postgraduate level. Ó Ð Ricardo Pinheiro-Alves, The Times Higher Education Supplement Thoroughly revised and updated, the second edition of this highly acclaimed textbook will be required reading for graduate and undergraduate students on a wide range of courses including: European economics, economic policy, European integration, European studies and international relations. Exploring the EU at an important turning point and during uncertain and turbulent times, the text will also prove an invaluable reference tool for academics and policy makers concerned with any facet of European integration. Comprehensive and accessible, this far-reaching text: ¥ provides in-depth, state-of-the-art analysis of the origins, achievements and prospects of principal EU economic policies ¥ covers all EU member countries as well as candidate countries ¥ sets scenarios for future EU policy and organisational evolution ¥ prescribes possible paths and directions for the EU, not only for economic policies but also for organisational structure; ¥ features supplementary data via a companion website. Topics explored in detail include: EU budget, competition policy, Common Agricultural Policy, fiscal integration, monetary integration, industrial policy in manufacturing and services, trade policy and international economic cooperation, regional policy, social policy, mobility of labour, energy policy, transport policy, environment policy and enlargement.

The perspectives of academics and practitioners are brought together in this insightful work, which examines the war on terrorism, the Iraq war and the roles of NATO and the EU. The book analyzes the new threats posed by terrorist strikes and the proliferation of weapons of mass destruction despite the total failure of Cold War conceptions of deterrence. It also delineates the key issues and problems that have arisen from the NATO and EU double enlargement and from the new NATO-Russian relationship. Casting light on the global and regional ramifications of the crisis, as well as the tensions in the transatlantic relationship caused by the war with Iraq, NATO and the European Union addresses the key policy questions that concern the maintenance of global peace and security.
