The goals of the educational process were classified by Benjamin Bloom into a hierarchy of educational objectives. This classification system, known as Bloom's Taxonomy, divides cognitive objectives into subdivisions ranging from simple to complex. Although other systems have been proposed, Bloom's remains widely recognized by educators and utilized in Critical Thinking curriculum. The six subdivisions include knowledge, comprehension, application, analysis, synthesis, and evaluation. This book is divided into six sections to match the subdivisions of Bloom's Taxonomy and designed to teach critical thinking skills by providing a variety of across-the-curriculum activities in math, language arts, science, social studies, history, geography, art, and music. An answer key is included.

This packet is designed to teach critical thinking skills in conjunction with Benjamin Bloom's hierarchy of educational objectives. These engaging activities will teach students to correctly use idioms, add prefixes and suffixes, sort objects, create surveys, interpret and create graphs, and more! Answer key is included.
